

Notice is hereby given pursuant to 20.6.2.3108.H NMAC, the following Groundwater Discharge Permit applications have been proposed for approval. To request additional information or to obtain a copy of a draft permit, contact the Ground Water Quality Bureau in Santa Fe at (505) 827-2900. Draft permits may also be viewed on-line at <http://www.nmenv.state.nm.us/gwb/NMED-GWQB-PublicNotice.htm>

NOTE – If viewing by WEB - Click on facility name to review a copy of the draft permit.

DP #	Facility/Applicant	Closest City	County	Notice	NMED Permit Contact
1732	Rosa Mora Colin Cannon, Owner Cannon Industries, LLC P.O. Box 1910 Alto, NM 88312	Carrizozo	Otero	Rosa Mora, Colin Cannon, Owner, proposes to renew and modify the Discharge Permit for the discharge of up to 15,000 gallons per day (gpd) of domestic septage, 4,000 gpd of domestic wastewater treatment facility sludge, 5,000 gpd of the aqueous portion of food-related grease trap/interceptor waste to six 2.75-acre surface disposal cells at a 40-acre facility. Additionally, the proposed discharge includes the dewatering of up to 4,000 gallons per week of vehicle wash sump waste and mechanic shop oil/water separator waste and the discharge of the aqueous portion to a synthetically lined impoundment for disposal by evaporation. Potential contaminants associated with this type of discharge include nitrogen compounds, metals, and organic compounds. The facility is located one mile west of Highway 54 on Otero County Road B028, approximately 26 miles south of Carrizozo, in Section 33, Township 11S, Range 09E, Otero County. Groundwater beneath the site is at a depth of approximately 240 feet and has a total dissolved solids concentration of approximately 1,796 milligrams per liter.	Kathryn Hayden kathryn.hayden@state.nm.us
1737	Village of Floyd Water Treatment System Colin Chandler, Mayor Village of Floyd P.O. Box 69 Floyd, NM 88118	Floyd	Roosevelt	Village of Floyd Water Treatment System, the Honorable Colin Chandler, Mayor, proposes to renew the Discharge Permit for the discharge of up to 16,700 gallons per day (gpd) of reject and backwash wastewater from a reverse osmosis system to a double synthetically lined impoundment, equipped with a leak detection system, for disposal by evaporation. Potential contaminants associated with this type of discharge include metals and total dissolved solids. The facility is located at 1564 NM Hwy 267, Floyd, NM, in Section 15, Township 01S, Range 32E, Roosevelt County. Groundwater beneath the site is	Kathryn Hayden kathryn.hayden@state.nm.us

				at a depth of approximately 80-85 feet and has a total dissolved solids concentration of approximately 789 milligrams per liter.	
289	City of Santa Fe Wastewater Treatment Facility Shannon Jones, Director Wastewater Management Division City of Santa Fe 73 Paseo Real Santa Fe, NM 87507	Santa Fe	Santa Fe	City of Santa Fe Wastewater Treatment Facility, Shannon Jones, Director Wastewater Management Division, proposes to renew the Discharge Permit for the discharge of up to 13 million gallons per day of treated wastewater. Treated (reclaimed) wastewater is discharged for in-plant use, to the Santa Fe River under NPDES Permit NM0022292 and this Discharge Permit, or used for irrigation under this and other discharge permits. Potential contaminants associated with this type of discharge include nitrogen compounds. The facility is located at 73 Paseo Real, Santa Fe near the intersection of Airport Road and NM Highway 599, in Section 10, Township 16N, Range 8E, Santa Fe County. Groundwater beneath the site is at a depth of approximately 116 feet and has a total dissolved solids concentration of approximately 250 milligrams per liter.	Russell Isaac russell.isaac@state.nm.us
1838	Cimarron Village Wastewater Treatment Plant Joe Miller, Owner Cimarron Village Wastewater Treatment Plant 286 Riverbank Road Lamy, NM 87540	Eldorado	Santa Fe	Cimarron Village Wastewater Treatment Plant, Joe Miller, Owner, proposes to discharge up to 30,000 gpd of domestic wastewater using a wastewater treatment plant. The permittee is proposes to discharge treated wastewater to a 25,600 ft ² subsurface low pressure dose disposal field or to use reclaimed wastewater for drip irrigation of approximately 2.9 acres of landscaped public areas. The permittee also proposes to sell reclaimed wastewater for use in accordance with above ground, Class 1B or lower uses, such as dust control. Potential contaminants associated with this type of discharge include nitrogen compounds. The facility is located Colina Dive, approximately 1,000 feet northeast of the intersection of Colina Drive and NM-285, in Eldorado, Section 9, Township 15N, Range 10E, in Santa Fe County. Groundwater beneath the site is at a depth of approximately 40 feet and has a total dissolved solids concentration of approximately 298 milligrams per liter.	Kathryn Hayden kathryn.hayden@state.nm.us

Prior to ruling on any proposed Discharge Permit or its modification, the New Mexico Environment Department (NMED) will allow thirty days after the date of publication of this notice to receive written comments and during which time a public hearing may be requested by any interested person, including the applicant. Requests for public hearing shall be in writing and shall set forth the reasons why a hearing should be held. A hearing will be held if NMED determines that there is substantial public interest. Comments or requests for hearing should be submitted to the Ground Water Quality Bureau at PO Box 5469, Santa Fe, NM 87502-5469.
